## 1. THE ROUND SHAPE

The frame of a round trampoline is very strong. On a round trampoline you always jump towards the centre. The best jumps are made in the centre of a round trampoline. This is because the tension on the springs and the frame is equally divided when jumping.

### **3. FRAME**

The frame of the Talent trampolines has a very long lifespan. This is due to the large diameter of 34/38,1 mm and the wall thickness of 1,35/1,5 mm. In addition, the frame has a solid zinc layer.

## 5. SAFETY NET COMFORT

The Safety Net Comfort is a safe net through the self-closing entrance with recognizable piping. The poles of the net can easily be attached to the trampoline frame (Regular or InGround). Due to the thick foam around the poles, it is extra safe.

Foam padding around the Safety Net poles provides extra protection.
