WHY AN ELITE?

The very best trampoline

The BERG Elite has been developed with great attention and care. This resulted in a qualitative excellent trampoline, which is safe to use. It does not matter which one you choose, you choose quality with a BERG Elite. The BERG Elite is cleverly designed for long and safe jumping. The combination of the TwinSpring Gold springs and the AirFlow jumping technique ensures less air resistance, a larger jump area and more jumping fun! The protective edge is of extreme good quality.

The BERG Elite is available in different sizes and colours. The Elite is available as Regular, InGround, Sports and FlatGround (Sports) trampoline.

In this productsheet you can find information about:

- The round shape
- Less resistance with the BERG AirFlow jumping technique
- TwinSpring Gold springs for optimal jumping comfort
- Extra safe due to the thick PVC protective edge
- Galvanized and powder coated frame
- Available with Safety Net Deluxe

Warranty

Frame:	13 jaar*
Protective edge:	5 jaar
Jumping mat:	2 jaar
Springs:	5 jaar

* On registration at bergtoys.com/registration.

*Superior quality
and **safety***

BERGTOYS.COM

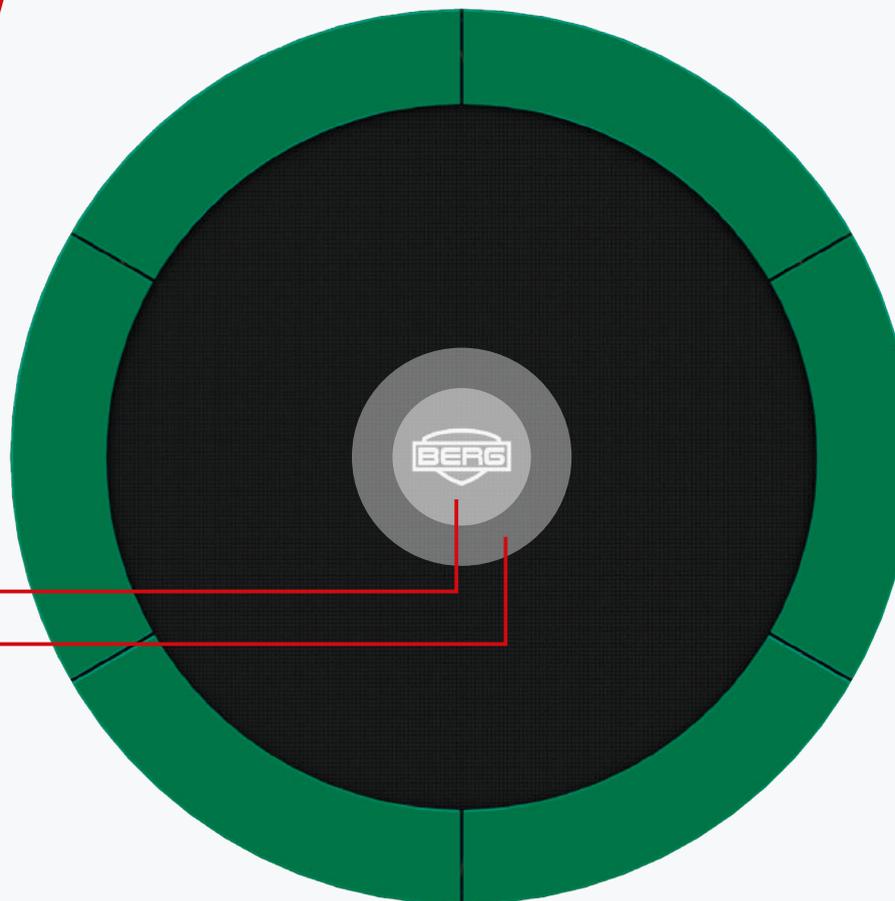

1. THE ROUND SHAPE

The frame of a round trampoline is very strong. On a round trampoline you always jump towards the centre. The best jumps are made in the centre of a round trampoline. This is because the tension on the springs and the frame is equally divided when jumping.

Perfect Jump Area GoldSpring Solo

Perfect Jump Area TwinSpring Gold

*Superior quality
and **safety***

* TwinSpring springs are fitted on the Elite and Champion trampolines as standard.

BERGTOYS.COM

2. PVC PROTECTIVE EDGE

The padding of the Elite is extremely UV-resistant. The edge is extra durable due to the superior material and the precise workmanship. The Elite padding lasts for years and is available in gray, green and red.

- The best quality padding in the market
- Suitable for professional use
- High-quality finish
- Large overlap with the springs and the frame

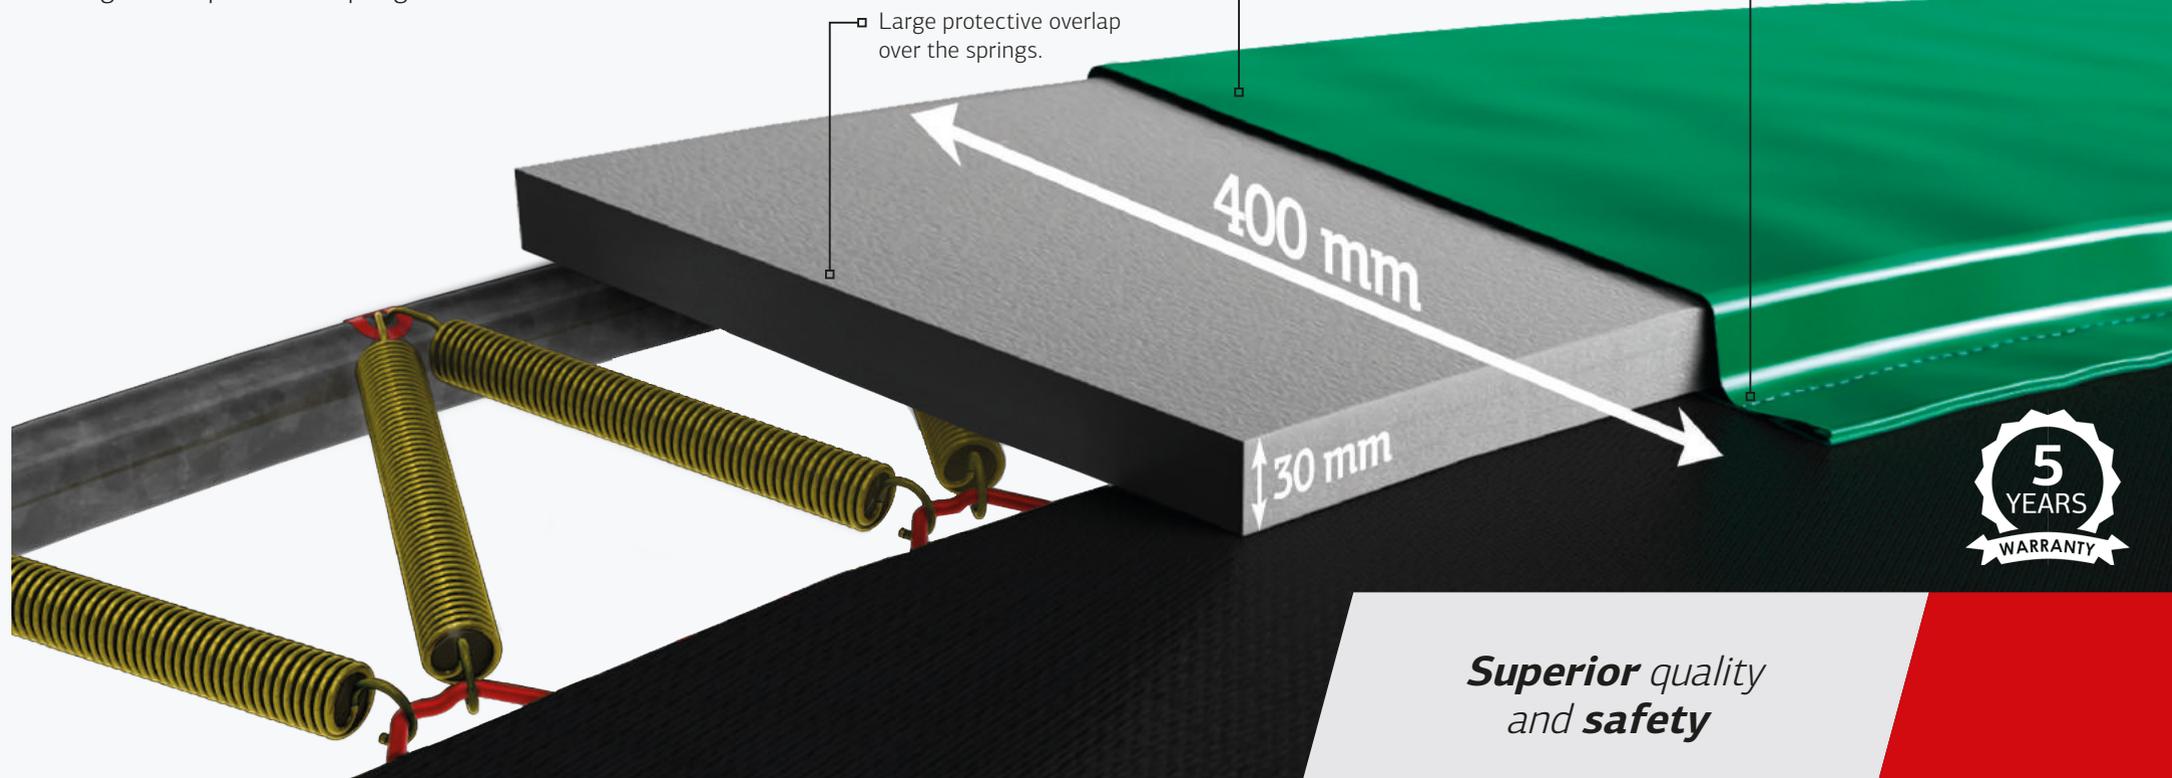

UV10

UV-resistant protective edge

□ The custom padding fits perfectly over the frame and has been designed with great attention to detail, which is evidenced in the extremely strong and beautifully finished stitching.

□ The Elite's protective edge is made of the highest quality PVC. The luxury padding also has a UV-resistant protective layer.

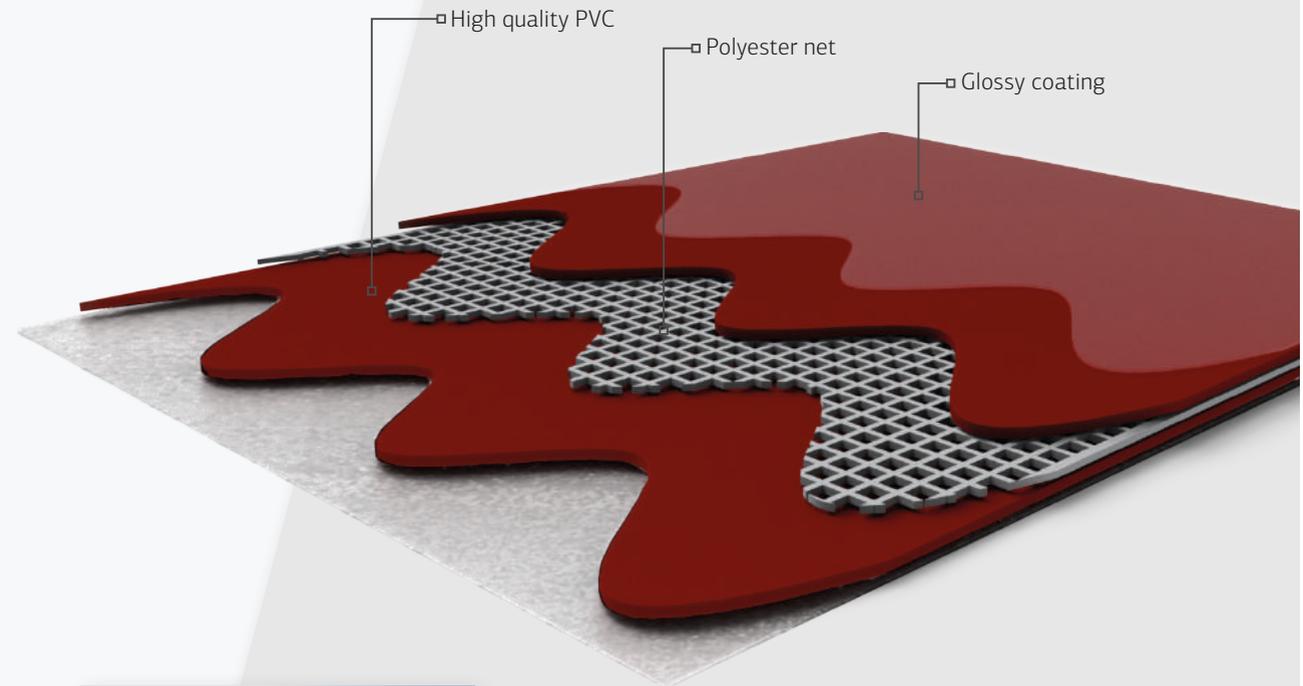

□ Large protective overlap over the springs.

Superior quality and safety

- The Elite padding has an extremely long lifespan which keeps its good looks 2-3 times longer than a Champion padding.
- The adhesion of the PVC material to the polyester mesh inside is up to 50% better than on the Champion padding. Because of this, the material is much less prone to delamination.
- The canvas is finished with a glossy coating to provide a luxurious appearance. The coating not only looks nice, but it has a purpose because of the UV-blockers it contains. The glossy surface finish reflects the light and UV instead of absorbing it, which makes the canvas better resistant to decoloration and degradation caused by the influence of UV light.
- The Elite padding fits super tight around the trampoline. This helps preventing wrinkles and always looks nice and tidy. The design of the padding has a much tighter fitting than the one on the Champion models. It takes almost twice as long as the Champion padding to sew the parts together to achieve the tight fitting. The tight fitting is achieved by first stitching the canvas segments together and then filling it with the foam parts by hand.
- The padding has an extra flange on the inner edge that is there to make sure the padding always lays flush with the jumping mat and to prevent gaps in between the jumping mat and the padding.

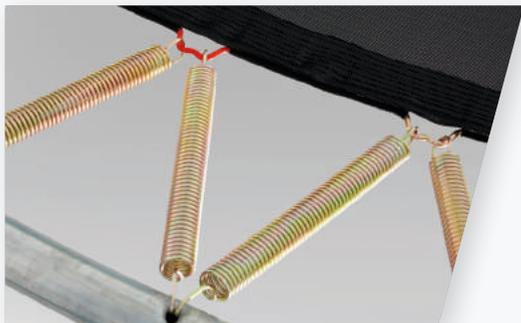

*Superior quality
and **safety***

3. AIRFLOW

Higher jumps mean more fun. We have developed the AirFlow technique to enable you to make higher jumps. This jumping mat allows 50% more air permeation compared with a standard jumping mat. Good airflow ensures less resistance while jumping, which is why you can make higher jumps.

The durable AirFlow jump mat is made from woven polypropylene. The jump mat contains special spring-eyes for the TwinSpring system. The loops for the strong metal spring eyes are thoroughly joined to the jump mat with no less than 8 rows of stitching.

AIRFLOW

The AirFlow product innovation is only available on the BERG Champion and BERG Elite lines.

*Superior quality
and safety*

BERGTOYS.COM

4. TWINSRING GOLD

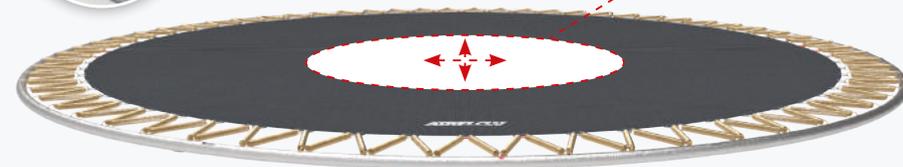

The perfect jump area is that optimal part of the jump mat which results in the best jump experience. Jumping outside of this area results in a sense of feeling as if you are being pushed towards the inner part of the trampoline. Trampolines comprising of TwinSpring Gold Springs are mounted in the shape of a "V". This allows for larger perfect jump area compared to trampolines that are sold with a conventional spring.

Another advantage? Due to the angled positioning of the TwinSpring Gold, the springs are longer in length without compromising the size of the jump mat. This results in a safer trampoline that optimizes playing pleasure!

TwinSpring Gold

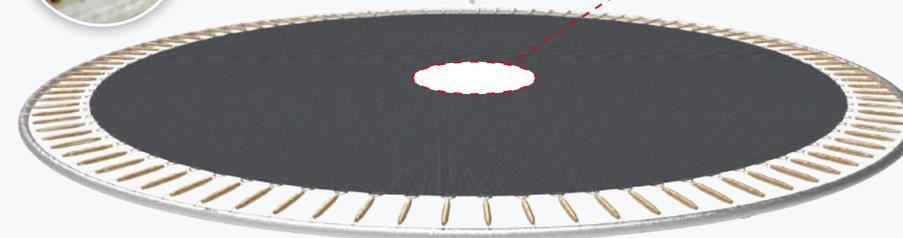

Perfect Jump Area

GoldSpring Solo

Perfect Jump Area

*Superior quality
and **safety***

5. FRAME

The frame of the Elite trampolines has a very long lifespan. This is due to the large diameter of 42 mm and the wall thickness of 2 mm. In addition, the frame has a solid zinc layer and the frame of the Regular trampolines have a protective black powder coat. The frame is therefore extra rust resistant.

BERG ELITE INGROUND + SAFETY NET DELUXE

The very best trampoline

BERG InGround Trampoline ● ● ●

A sunken trampoline with a safety net has a low threshold, making it easy and safe to step onto. The InGround trampoline is less visible in the garden than a high trampoline.

BERG ELITE FLATGROUND

The very best trampoline

BERG FlatGround Trampoline ●

A FlatGround trampoline integrates seamlessly with your garden. This is because the protective edge of the trampoline is completely level with the garden. This makes the trampoline unobtrusive and very easy to step onto.

The rectangular tubular frame is very strong and of high quality. As a result, the trampoline remains stationary and noiseless.

The Elite FlatGround has a special noise-reducing strap underneath the padding. This prevents the padding from rattling against the jumping mat and enables you to make quite jumps.
