WHY AN ULTIM ELITE?

The very best trampoline

Of all the trampolines, you can make the best jumps on the BERG Ultim Elite. This trampoline has been specially designed for learning and performing the coolest and newest tricks. The trampoline is 5x3 metres, which means you have an enormous amount of jumping space! Just like the Olympic trampolines, this Ultim Elite is rectangular in shape. This means that you can make superfine jumps over the entire length and width of the trampoline. A rectangular trampoline also gives you more control over the jumps that you make.

The AirFlow jumping mat and the TwinSpring springs ensure that you can make extra high and supple jumps. The Ultim Elite has been designed with care, which has resulted in a very safe trampoline.

In this productsheet you can find information about:

1. The rectangular shape
2. The protective edge
3. The jump mat
4. The springs
5. The frame
6. Safety Net DLX XL
7. AeroWall BLK&BLK

WARRANTY

Frame: 13 years*

Protective edge: 5 years

Jumping mat: 2 years

Springs: 5 years

* On registration at bergtoys.com/registration

BERGTOYS.COM

1. THE RECTANGULAR SHAPE

On a rectangular trampoline you can jump over the entire length. The jumps that you make on a rectangular trampoline are more controlled. That's why rectangular trampolines are used by top performers at the Olympic Games.

2. PVC PROTECTIVE EDGE

The padding has an extra flange on the inner edge that is there to make sure the padding always lays flush with the jumping mat and to prevent gaps in between the jumping mat and the padding.

The Elite padding fits super tight around the trampoline. This helps preventing wrinkles and always looks nice and tidy. The design of the padding has a much tighter fitting than the one on the Champion models.

High quality PVC.
The Elite padding has an extremely long lifespan which keeps its good looks 2-3 times longer than a Champion padding.

Glossy finish.
The protective edge looks even more luxurious with the glossy finish. The finish also has a function: the glossy surface contains UV-blocking properties that reflect the light instead of absorbing it. The edge is therefore more resistant to discolouration and wear.

Polyester net.
The adhesion of the PVC material to the polyester mesh inside is up to 50% better than on the Champion padding. Because of this, the material is much less prone to delamination.

3. AIRFLOW

Higher jumps mean more fun. We have developed the AirFlow technique to enable you to make higher jumps. This jumping mat allows 50% more air permeation compared with a standard jumping mat. Good airflow ensures less resistance while jumping, which is why you can make higher jumps.

The jumping mat of the Ultim Elite has a large overlap over the springs. This ensures safety and prevents rattling of parts against the springs during jumping.

The blue marked edge is there to give a distinctive contrast between the jumping mat and the protective padding.

POWERED BY
AIRFLOW
& TWINSRING

The AirFlow product innovation is only available on the BERG Champion and BERG Elite lines.

50% more air permeation
for better jumping comfort.

AIRFLOW
Higher & more flexible
jumping.

Special padding band holders to keep tension on the band for this long rectangular padding.

The trampoline has a special noise-reducing strap underneath the protective edge. This prevents the protective edge from rattling against the jumping mat and enables you to make super quiet jumps.

4. TWINSPRING GOLD

The perfect jump area is that optimal part of the jump mat which results in the best jump experience. Jumping outside of this area results in a sense of feeling as if you are being pushed towards the inner part of the trampoline. Trampolines comprising of TwinSpring Gold Springs are mounted in the shape of a “V”. This allows for a larger perfect jump area compared to trampolines that are sold with a conventional spring.

Another advantage? Due to the angled positioning of the TwinSpring Gold, the springs are longer in length without compromising the size of the jump mat. This results in a safer trampoline that optimizes jumping pleasure!

5. FRAME

The rectangular tubular frame is very strong (140 mm x 80 mm) and of high quality. As a result, the trampoline remains stationary and noiseless.

The patented frame is easy to assemble and install.

▢ The frame blocks the sand from entering the pit.

▢ Extremely heavy duty frame.

The frame segments are joined together by four bolts and nuts at each transition to ensure a solid and noiseless construction.

black powder coating.

6. SAFETY NET DLX XL

The Safety Net Deluxe XL is extra high (220 cm). This makes the net extra safe. The high opening makes it easy to access the trampoline.

22% XL

**HIGHER
& SAFER**

Extra safe due to the thick layer of foam around the Safety Net poles.

The pole sleeve has a long split that can be closed with a strip of Velcro.

The Safety Net pole is attached to the clamp with an extra-long weld. The pole is therefore extra strong.

The poles are equipped with sturdy clamps that are easy to assemble on both the Regular and the FlatGround trampoline.

Extremely safe, self-closing entrance with distinctive trim.

The unique, rectangular-shaped hoop at the top of the Safety Net keeps the net nice and taut.

The top caps of this trampoline connect the hoop to the poles. The caps have an easy click system and are therefore easy to attach.

The robust, curved poles provide more space between the Safety Net and the pole and therefore provide extra safety.

Having the net attached to the outer edge of the padding creates a larger jumping surface.

High-quality, dimensionally stable netting that feels soft to the touch.

7. AEROWALL BLK&BLK

The unique AeroWall BLK&BLK is designed for practising (extreme) tricks by professional jumpers. The material that is used has the unique drop stitch technology that causes the wall to be surprisingly sturdy.

The wall is inflated and then attached to a strong and solid frame. This makes the wall very sturdy and suitable for jumping against. The inflatable Wall can easily be installed and removed in less than a minute work. When the frame is removed as well, the openings for the frame can be closed with special designed foam caps.

BERG Airpump.

Drop stitch technology.

The persons shown in the image are trained athletes who practice trampolining as a sport.

Foam caps for when the AeroWall BLK&BLK is not in use.

The AeroWall BLK&BLK is only possible in combination with the FlatGround.

BERG **ULTIM ELITE**

The very best trampoline

BERG Regular + Safety Net ● ●

If you prefer not to dig a hole in your garden, a high trampoline is a good choice. A high trampoline is easy to install and move around. A high trampoline is also clearly visible in your garden.

BERG FlatGround + Safety Net ● ●

A FlatGround trampoline integrates seamlessly with your garden. This is because the protective edge of the trampoline is completely level with the garden. This ensures a very easy step-on. The Safety Net ensures that every user can jump safely.

BERG FlatGround ● ● **SPORTS**

A FlatGround trampoline integrates seamlessly with your garden. This is because the protective edge of the trampoline is completely level with the garden. This makes the trampoline unobtrusive and very easy to step onto.
