WHY A BUZZY?

Easy to ride, easy to master

Get your first pedal experience on a BERG Buzzy. This super cool sensation on four wheels is much more stable than a three-wheeler. Your feet remain firmly on the pedals even round sharp corners.

The size of the BERG Buzzy and its EVA tyres make it suitable for indoor and outdoor use. Even the rain will not stop you from having lots of fun with your go-kart! The BERG Buzzy is suitable for children aged 2-5.

Also, the BERG Buzzy's features make it much safer and more fun than a tricycle.

- **EVA** tyres (1), so no more flat tyres!
- **Helps** (2) children learn to pedal.
- Smooth and light pedalling.
- Can be driven forwards and backwards.
- **Stable** (3) due to the four wheels.
- A swing axle for perfect roadholding.
- **The pedals** (4) remain within easy reach when steering.
- Infinitely adjustable steering height.
- Three adjustable seat positions.
- Suitable for children aged 2-5.
- TÜV approved.

1. EVA TYRES

For the BERG Buzzy, this high-tech foam is the ideal replacement for the traditional rubber inner and outer tyres. Thanks to the right composition, the tyres are just as durable as traditional rubber tyres but without the risk of a flat tyre.

The tyres are also very silent when driving, which makes them ideal for indoor and outdoor use.

2. HELPS WHEN PEDALLING

Easy to ride, easy to master

The BERG Buzzy is equipped with a fixed connection between the front axle (1) and the rear axle (2).

This means that the movement of the legs is immediately converted to the movement of the rear wheels. This makes the BERG Buzzy super simple and easy to ride, both forwards and backwards.

An additional advantage is that the movement/rotation of the rear wheels (which occurs when pedalling, or when pushed) is also translated to the front axle. Therefore, once the go-kart is moving, you can continue pedalling very easily.

The movement of the wheels makes the next rotation of the pedals much easier! A superlight and great way to learn to pedal!

Also, the front and rear axles are mounted on ball bearings, making the pedals and rear axle run supersmooth and light.

3. STABLE THANKS TO 4 WHEELS

Easy to ride, easy to master

Thanks to its four wheels, the BERG Buzzy has excellent stability. Because tricycles have one wheel less, they are prone to tipping over. Riding sharply or fast around corners on a tricycle creates dangerous situations.

In a BERG Buzzy these lines are parallel and further away from the driver. This ensures that there is no tipping point so that tipping over is virtually impossible.

In addition, the BERG Buzzy has a swing axle. This creates a swinging motion of the front wheels which absorbs road surface irregularities. There is thus even less risk of falling!

Tricycle is unstable:

BERG Buzzy is stable:

The **safest way** of learning to pedal!

4. PEDALS ACCESSIBLE

Easy to ride, easy to master

In addition to being unstable, a tricycle has two other major disadvantages. The designers of the BERG Buzzy have even been able to resolve these two disadvantages.

On a tricycle the pedals (and thus the feet) and the handlebars (and thus the hands) are directly connected to the front wheel. On a BERG Buzzy the wheels are attached to the frame. This has the following two advantages:

- Steering: when steering the feet/legs remain firmly on the pedals and therefore the wheel can never touch the legs.
- Pedalling: when pedalling you are not pushing the wheel (and therefore the steering wheel) one way. On a tricycle this would lead to a foot and/or a hand coming off the pedal and/or handlebar.

On a BERG Buzzy no energy is lost because the child does not have to focus on these distractions. The child steps on and can easily and smoothly set off.
